ACRYLIC PROJECT REFERENCES

INTRODUCTION

WORLDBIZZ PTE LTD takes this opportunity to thank all architects, building professionals and clients for their support in using our services for the supply and installation of acrylic panels. It has been exciting to work with so many projects that are challenging and to successfully complete such projects on time.

We will strive to work closely with you on new designs on the application of acrylic for upcoming projects be it commercial, public or residential. The project references in this handbook are some of the many projects that we have done since 2005.

We have the experience and expertise to work with acrylic especially relating to chemical welds, thermoforming for flat panels and we are able to provide vacuum forming for acrylic dome. This is the third of such handbooks to be published on a yearly basis for us to acknowledge the project developers, architects, and all building professionals that we get to work with.

With our sincere thanks and appreciation.

Infinity Pool

The project used a total of three acrylic panels of 90mm thickness. One part is already thermoformed, taking the shape from a template which was lifted off the site dimensions. The three panels are then chemical welded on site.

PRESTIGE PROJECT REFERENCE

River Safari

WORLDBIZZ's biggest project for supply and installation of PMMA Acrylic Panels to-date is the River Safari Project. There were a total of 12 acrylic panels in the Rivers of the World that were manufactured by Mitsubishi Ryoko (Japan) while huge acrylic panels of larger thickness at the Sunken Forest and Frozen Tundra were from Red Coral.
